

Smile in the Sky

(Jim Mayer/Jeff Dayton)

Did you ever stop and think about the sky above?
Covering this whole world with love?
Did you ever stop and wonder what it's made up of?
Tell me 'bout the sky above!

We can see the same sky differently
That's called perspective for you and me
Tell me, please, what do YOU see
Would you like to sing along with me?

There's a smile in the sky
From the sun all day
And the moon at night
They're winkin' at you as they go by
There's a smile in the sky

Did you ever stop and think about the ocean blue?
You couldn't swim across it if you wanted to
All those creatures now what do they do?
Tell me 'bout the ocean blue

We can see the same ocean from a sandy beach
Or deep under water so far out of reach
Splash in the waves swimming lessons to teach
We've got the sky,
We've got the earth,
We've got the ocean,
for each of us oh ya

There's a smile in the sky
From the sun all day
And the moon at night
They're winkin' at you as they go by
There's a smile in the sky

There's a smile in the sky
From the sun all day
And the moon at night
They're winkin' at you as they go by
There's a smile in the sky
They're winkin' at you as they go by
There's a smile in the sky
